## Planets and Days of the Week

LOCATED IN [SYMBOLS](#)

Each of the ruling planets are also aligned with a day of the week. We will now identify which day of the week is identified with each planet and then assign **symbols** for each of these days.

Each of these symbols will be variations based on a geometric shape, the sides of which are linked to the order of the magic square aligned to each of the ruling planets.

**Saturn:**     **Saturday**
